EESTEC

WHY eeStec ?

Because it is the place where you re-discover yourself and you learn about a world full of possibilities. It's all about determination and eeStec spirit!

Personal Development

High school is over and you're ready to move on to the next stage of your life – University. You became an academic citizen and you rapidly start to learn new things, meet new people and exchange ideas. Practice makes perfect and eeStec is the right place for that.

Have you ever expected during your students life to:

- ✓ Discover the secrets of project management and lead your team towards the implementation of a dream?
- ✓ Improve your technical knowledge?
- ✓ Express your creativity and get involved in the design team?
- ✓ Test your business communication skills while trying to obtain sponsorship for the projects you are planning?
- ✓ If you are people oriented, improve your human resources knowledge and make sure your colleagues are working with enthusiasm and passion for the upcoming events?
- ✓ Get involved in the international teams and enjoy the opportunities that not many youngsters of our age have?
- ✓ Learn about organizational management and continuity?

International Experience

And you think that's all? There's more to eeStec than meets the eye!

- ✓ Travel in more than 53 cities in Europe
- ✓ Gain academic knowledge and practical skills by taking part at the international workshops organized especially for eeStec-ers
- ✓ Experience new cultures, lifestyle, traditional cuisine and drinks
- ✓ Have fun abroad and party all night and day at an exchange
- ✓ Learn, work and celebrate together with hundreds of eeStec-ers from all around Europe

WHO are we?

eeStec is the non–political and non-profit organization of and for Electrical Engineering and Computer Science students who expect more from life.

We promote and develop international contacts and the exchange of ideas among EECS students all over Europe. Helping them improve their technical and personal skills in order to be prepared for their future careers is the main reason eeStec exists.

How we do it? We focus on organizing international events where students get to learn about different EECS topics and at the same time allowing them to have fun together with the rest of the participants.

Workshops

Surely the most popular events in the whole eeStec network, they're usually one week long practical sessions focused on a specific technological topic. The cultural and fun part are not forgotten as the participants get the chance to visit the host city and party at night.

Exchanges

They are some of the most desired type of events as they are rare but only leisure oriented. Their purpose is to enjoy a foreign culture and make international friends.

Trainings

Our international training team is ready to help our members improve their soft-skills which are becoming essential for a full development. More and more training events are held at both local and international level for eeStec-ers and it's something you definitely don't want to miss.

WHERE do I find eeStec?

- ✓ 53 local committees in Europe
- ✓ 28 countries
- ✓ More than 6000 eestec- ers

HOW do I set up an eeStec committee?

In order to set up an EESTEC committee, you need to fill the form we'll provide. Our dedicated team would be delighted to schedule a short skype meeting in order to explain how you could become the founder of an eeStec committee in your own city.
